

Kaivac 1750.

The **Kaivac 1750** combines high capacity, compact size and a compelling price to deliver the highest value possible in this fast growing category.

Designed for total soil removal, **No-Touch Cleaning**® combines an indoor pressure washer, chemical injection and wet vacuum technologies onto a single space-efficient platform. Workers simply spray cleaning solution on fixtures and floors, and then blast the soils to the floor with a high-pressure water spray. Finally, they vacuum the floor dry, completely removing soils and bacteria. The results are sparkling clean restrooms, kitchens, stairwells and more without ever touching a contaminated surface. No more soil, no more odor, no more complaints.

Multipurpose for Total Building Cleaning.

Like all **No-Touch Cleaning**® systems, the versatile **Kaivac 1750** accommodates an array of add-on components that instantly transforms it into a truly multipurpose machine.
