

Kaivac 2750.

The **Kaivac 2750** is the original **No-Touch Cleaning®** machine. It is designed with the largest capacity and strength for the most demanding of cleaning challenges. It's perfect for larger jobs or facilities, like airports, stadiums, factories and more.

Complete Cleaning for Healthy Results.

Like all **No-Touch Cleaning®** systems, the **Kaivac 2750** is specifically designed to thoroughly capture and remove soil, bacteria and other harmful indoor pollutants. Each system combines automatic chemical metering and injection, an indoor pressure washer, and a powerful wet vacuum into a single integrated deep cleaning system. As a result, it's scientifically proven to be 60 times more effective in reducing bacterial contamination than mops; which are more likely to spread contaminants than recover them. In fact, the **Kaivac 2750** cleans so well that it even beats the industry standards for food preparation areas. Besides cleaning better, it also cuts labor and chemical costs while inspiring worker pride.

Multipurpose for Total Building Cleaning.

Like all **No-Touch Cleaning®** systems, the versatile **Kaivac 2750** accommodates an array of add-on components that instantly transforms it into a truly multipurpose machine. For example, it quickly and easily transforms into a CRI Silver-Rated carpet extractor with the simple change of a wand. From hard surfaces to carpeted areas, the **Kaivac 2750** hygienically cleans virtually any area of the facility.

Highlights.

- ✓ Powerful 35 bar.
- ✓ Large 79.5 l fresh water capacity.
- ✓ Dual detergent holder with switch.
- ✓ Designed for large facilities and expansive areas.
- ✓ HEPA filtered vacuum and blower.
- ✓ CRI Silver-Rated carpet extraction capability.
